**HEY, ANYONE FOR SQUARE DANCING?**

Adult square dance classes began last Tuesday night in the Torrance Civic Auditorium at El Prado and Cravens aves. A good turnout attended the first classes of the current season and the recreation department reminded all people interested in learning to square dance to get into the classes before closing night, October 8.

The classes will be held from 8 to 10:30 p.m. every Tuesday night until next April. Gerald Reiser, popular Southland caller will take the square dancers through a complete course in beginning, intermediate, and advanced square dancing. If there is a large enough group, an opportunity to attend many parties and square dance festivals will be offered the classes during the coming months.

In the spring there will be an extension of the classes offered to the couples who desire to learn popular folk and round dances. Graduates of this class will be able to join any square dance group in the area including the local Corn Stompers, a group sponsored by the Torrance Recreation Department.

Registration blanks for the beginning classes can be obtained from the Torrance Recreation Department, 3031 Torrance Blvd., and at the Torrance Civic Auditorium on Tuesday, September 24, October 1, or October 8.

**Reason for LA Smog Discovered?**

Could be that Los Angeles will soon uncover a probable source of all that smog? Exhaustive research has disclosed that comedian George Burns lights up over 40 cigars during each day of shooting on CBS Television's "The Burns and Allen Show." Since the show has been on for seven consecutive years (it will launch its eighth season September 30) and it films an episode a week, this means that 12,880 stogies have gone up in smoke since the series first went on the air! And this is taking into consideration, an average of six weeks per year vacation from shooting.

The man who has made a cigar his trademark of course smokes when he's not before the cameras, but to date, statistics on this more personal side of Mr. Burns, are not readily available. When the cigar total of the other six days is learned, it just might be the heretofore harrassed men of the Air Pollution Control District in Los Angeles who have labeled incinerator burning, industrial smokestacks and automobile exhausts as the serious offenders in smog control edicts, will be tearing up their long-range plans to buckle down to that old drawing board again!
